A TRUSTED BRAND WITH A STRONG COMMERCIAL LEGACY

Since 1919, FIAT® Products have been making their way into hotels, schools, offices, hospitals, and homes. As a leader in commercial, institutional, and residential markets, FIAT's decades of experience in the design, development, and manufacturing of plumbing products has led to an impressive array of durable high-quality products from terrazzo shower floors to mop service basins and laundry tubs.

THE FIAT ADVANTAGE

The **most specified** brand in the industry

Made from **high quality** raw materials

Leader in quality, durability, and safety

Shower floors, mop service basins, and laundry tubs are **Made in the USA**

Reliable and dependable customer and technical service teams

MATERIAL DESCRIPTIONS

TERRAZZO

There is not a finer and more durable material for mop basins and shower floors than precast terrazzo. FIAT®'s mop service basins, composed of black and white marble chips cast in grey Portland cement, and shower bases, composed of black and white marble chips cast in white Portland cement, have a minimum compression strength of 3,000 psi. They are also easy to maintain and install.

Used in FIAT Mop Service Basins and Shower Floors

MOLDED-STONE® OR SHEET MOLDING COMPOUND (SMC)

Molded-Stone or SMC contains a calcium based material that while being low cost, provides weight, strength, and fire retarding properties. The SMC process permits the use of longer glass fibers, which are placed in a multiple overlap of individual strands to permit total impregnation and wetting-out of the fibers without any fiber degradation that can diminish the strength imparting properties. The more thorough bond of the glass fibers reduces the amount of fibers necessary for maximum strength resulting in both lower weight and a denser, smoother, void-free product.

Used in FIAT Mop Service Basins, Shower Floors and Laundry Tubs

GELCOAT

Gelcoat material is made entirely out of fiberglass with a gelcoat surface finish. This gelcoat is a polyester resin on the surface of the fiberglass material. This type of material is affordable and can be repaired easily.

Used in FIAT Shower Floors

POLYPROPYLENE

Polypropylene is a versatile thermoplastic polymer widely used in various industries due to its combination of properties. This very versatile material is used in products from water bottles to laundry tubs. FIAT polypropylene laundry tubs are made from high density polypropylene material that is light weight and durable.

Used in FIAT Laundry Tubs
