### INSTALLATION PLANNING

This laundry tub is designed to fit into a standard cabinet counter top.

Determine the desired location of your tub on the counter top. Make sure the position will fit on the flat area of the counter top taking into account the radius curve of the back splash (if applicable). Also note clearance below the counter top to assure room for faucet and drain connections.

Putty Knife

## 1 INSTALLATION PROCEDURE

Carefully measure for the countertop cutout (refer to "CUTOUT TEMPLATE" on page 2). The tub is designed to fit a cutout measuring 18" x 15-1/2". When making the layout, take note of Detail "A" below. If the countertop has a back splash, do not start the cutout closer than 1" from the radius. Otherwise, the rim of the tub may ride up on the radius, resulting in the tub being out of level.

Drill a 7/8" diameter pilot hole at each corner of the cutout. Make a saw cut along the inside of the layout lines. (See Figure 1).

## 2 SEALING THE TUB TO COUNTERTOP

Remove tub from cutout and install faucet (purchased separately). Use flexible supply lines where permissible. If sweat connections are required, make all attachments before the tub is in place. Install the drain assembly.

Apply a continuous 3/8" bead of sealant to the under side of the tub rim. Lift tub and place into countertop.

Install the locking bars at the corners. These bars clamp the rim of the tub to the counter top. They are attached using screws that thread into each corner of the underside of the tub rim. (See Figure 2).

Wipe away any wet sealant before it cures.

## UTILITY SINK CARE AND CLEANING

This utility sink has been specifically designed and engineered to exceed demanding strength and stress factors required for use. It is stain resistant, semi gloss finish. Like any fine finish, it requires reasonable care to maintain its beauty and luster. **Day-to-day cleaning:** Wash with warm water, a soft cloth, and mild liquid detergent. **For stubborn stains:** Use a Non-Abrasive, liquid detergent cleaner, applied using a soft cloth. More persistent stains, tar, or paint can be removed with naphtha or mineral spirits. Remove excess plaster by scraping with a sharpened soft wood stick. Avoid wire brushes, metal scrapers, or tools. **NEVER USE ABRASIVE SCOURING POWDERS, SOLVENT BASED CLEANSERS, OR SCOURING PADS AS THEY TEND TO DULL THE FINISH.**
